Installation and usage

1. Download the latest version of GAPoTNumLib from GitHub: https://github.com/ga-explorer/GAPoTNumLib

2. Make sure the GAPoTNumLib.Framework project is the default project of the solution

3. Open and Build the GAPoTNumLib solution using x64 Debug configuration

4. In the MATLAB toolbox open the file gapotInit.m and edit the variable gapotAssemblyPath to be the path containing the GAPoTNumLib.Framework.exe file

5. In MATLAB add the toolbox folder to the MATLAB path

6. You can find examples for using the toolbox in files gapotSample1.m, gapotSample2.m, etc.
